"Love it! I didn't expect to read the whole thing while sitting here, but it was too readable to put down, and finish up later. I already have a list of folks to whom I would love to send your book. I will definitely read it again, and again...it's like a coach at a pep rally getting you fired up for the game."

— Paula Bourelly, MD, Assistant Professor, Dermatology,
Georgetown University

"The info and concept are very good. The writing is concise and the overall length is great...it's a really good project."

— Brett E. Chambers, award-winning producer/director and educator
